SUMMARY

Starting as a student in the Galvanize Phoenix campus, I have been involved in the tech industry since early 2018. As a rapidly growing and evolving ecosystem, I have found the tech industry to be quite enjoyable for the constant challenges that it can bring. I thrive on challenges and growth, so I would love to be able to contribute my skillset to any community/environment that can help me grow as a developer and as a person.

EMPLOYMENT

Prism Studios

December 2018 - March 2019

Front-End Engineer (Internship)

- Worked in an agile development process using Jira
- Collaborated with product owners, UI/UX designers to ensure application meets all requirements
